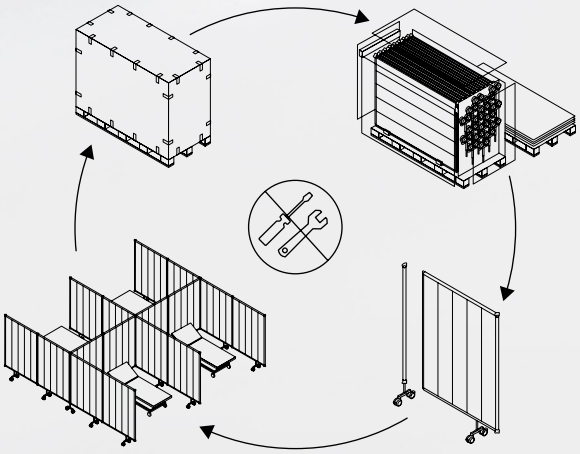
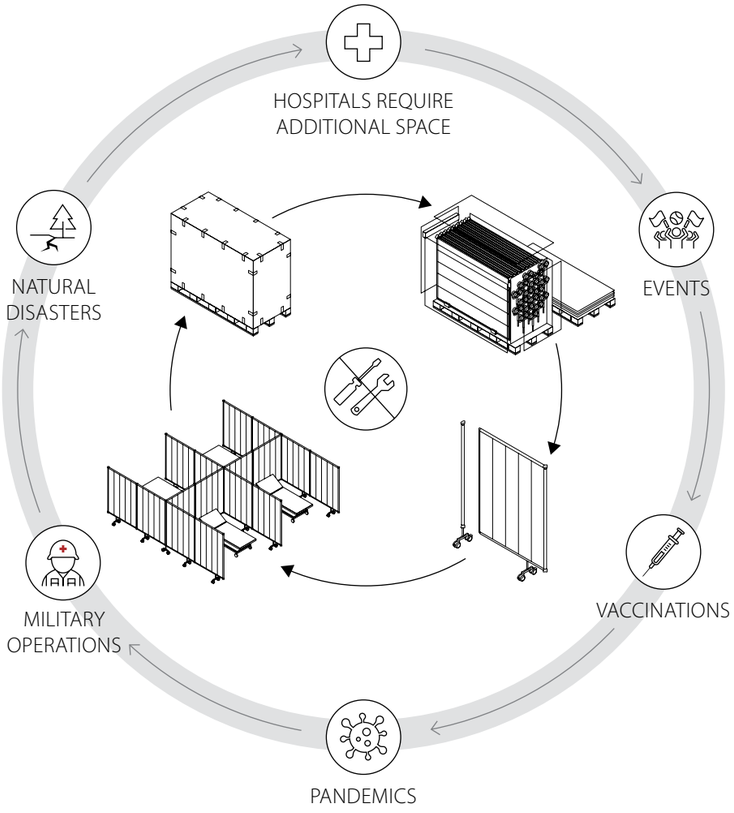
Silentia PopUp

HOSPITAL IN A BOX



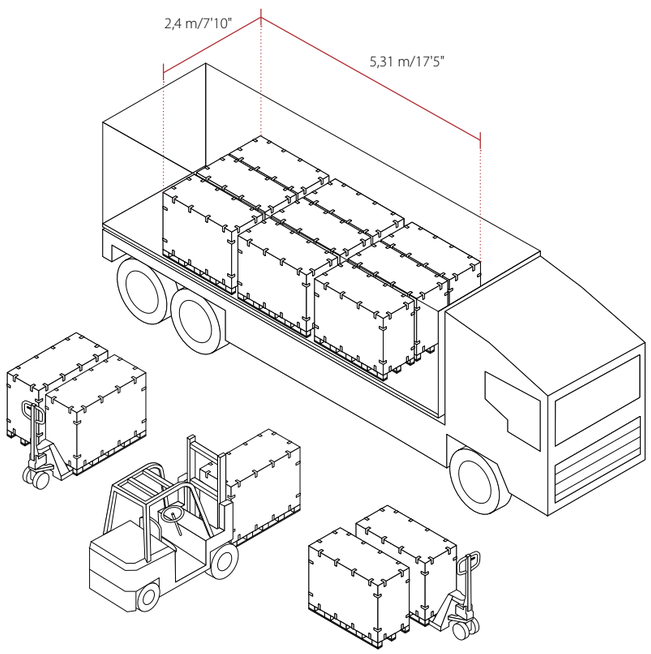
Silentia PopUp, flexible privacy in any emergency



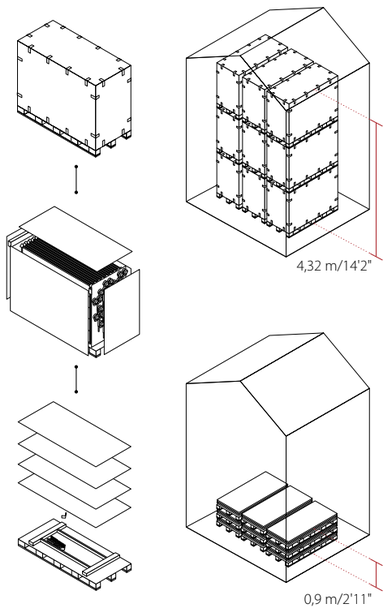
The detachable spring steel clips allow tool-free assembling and disassembling.

EasyClick™ enables tool-free panel attachment. The Silentia holder ensures quick access to equipment.

Transport



Storage

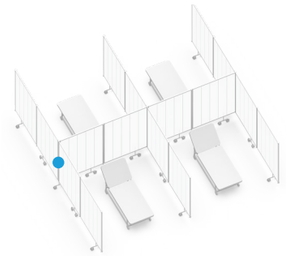


An emergency box for urgent privacy and flexibility

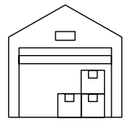
The Silentia PopUp was designed for temporary, safe patient environments during emergencies or for privacy needs in public spaces like arenas and sport halls.

Tool-free assembly and disassembly, ISPM15-compliant plywood box. Delivered on an extended EU pallet.

A box contains one start pole and 16 panel walls. The panels are opaque frosted letting light shine through.



One box contains for example four patient rooms, or 8 vaccination booths. Units are all mobile.



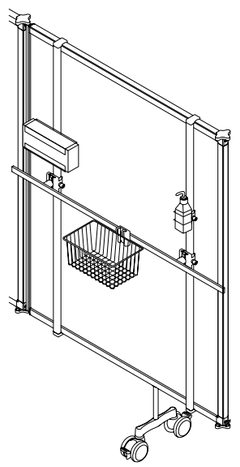
The wooden box is durable for long-term storage and can be stacked.

No tools or additional accessories are required for either the box or panels.

Panels are easy to clean on-site and withstand healthcare disinfectants.

Silentia holder

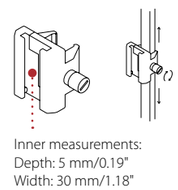
Add Silentia holders to the PopUp.



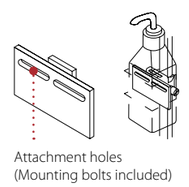
The Silentia holder gives easy access to personal protective gear, medical rail, equipment, etc.

Holder:

Accessory clamp:



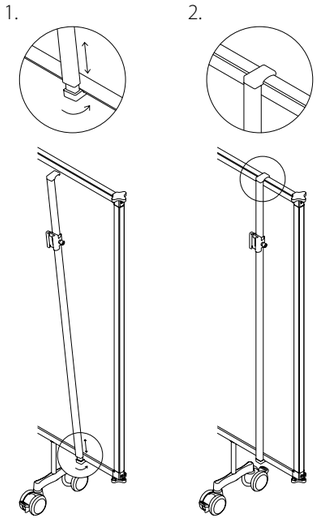
Adapter plate:



Accessory clamps and adapter plates allow an easy addition of equipment and accessories.

1.

2.



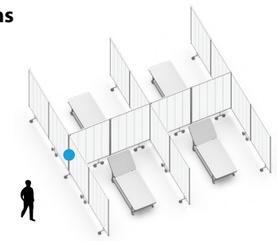
The Silentia holder attaches to the Silentia screen and does not require any tools.

Patient rooms

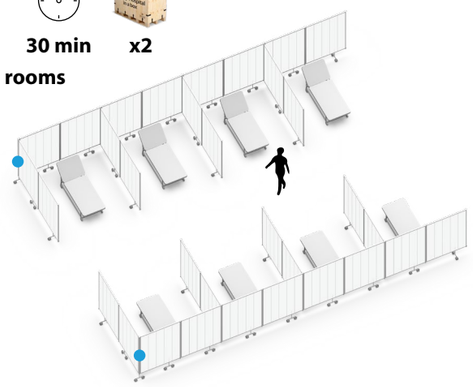
The Silentia PopUp offers a fast, flexible solution for setting up temporary medical units.

Start pole

x1 15 min x1
= 4 rooms



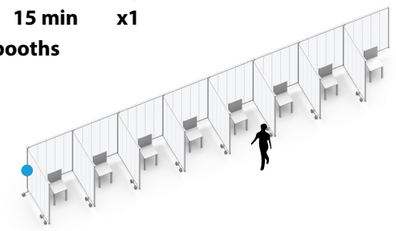
x1 30 min x2
= 8 rooms



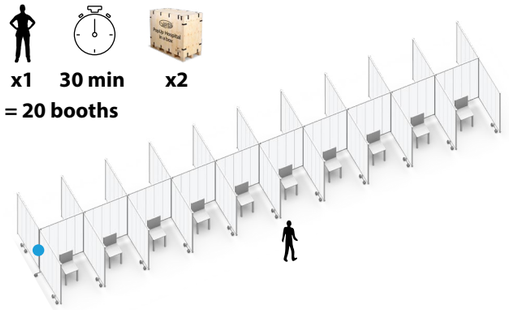
Vaccination booths

The Silentia PopUp can easily be reconfigured into vaccination booths, offering both one- or two-sided solutions.

x1 15 min x1
= 8 booths

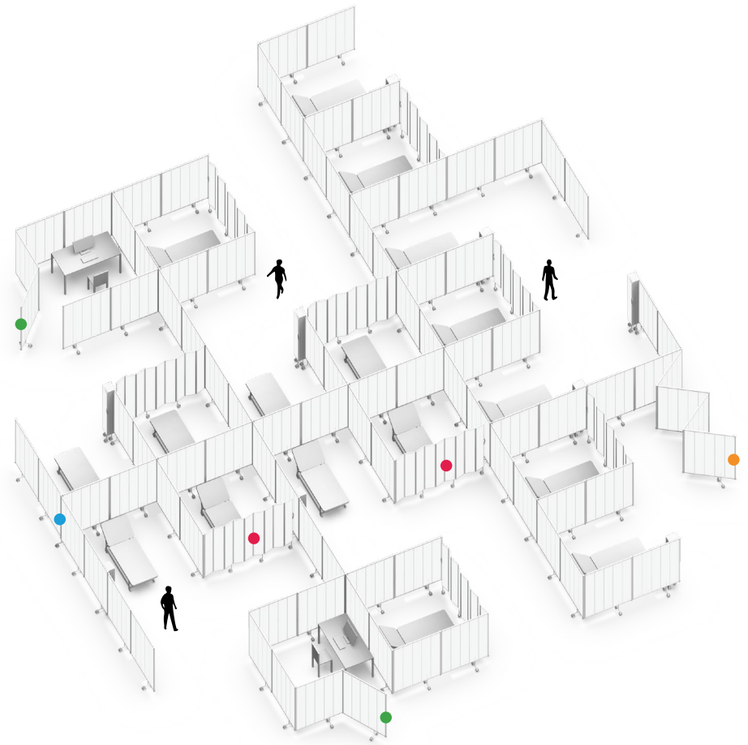


x1 30 min x2
= 20 booths



Modular rooms

Divide a large room or an enclosed space into smaller modular rooms, for use by emergency/pandemic response teams, international assistance organizations, military field hospitals, etc.



x1 90min x6
= 2 admin rooms
= 17 patient rooms

- Start pole
- Door

Panel walls can be used as doors.

- Folding wall

Combine panels and create larger folding walls.

Additional

- Folding screen

Add Silentia folding screens for full patient privacy with EasyClick™.

A proven track record
